LCD 105: INTRODUCTION TO PSYCHOLINGUISTICS
Department of Linguistics & Communication Disorders · Queens College · CUNY
Summer 2005

Prof. Eva M. Fernández
Office: Kissena 355
Voice: 718-997-2867 · Fax: 718-997-2873
Email: eva.fernandez@qc.cuny.edu
Meeting Times: M-Th, 10:00-11:34 am
Office: Kissena 355
Classroom: Kiely 270
Office Hours: M, 2-3
Email: eva.fernandez@qc.cuny.edu
Code 0486; Sec 2LXBA

(A reading schedule is listed on the back of this sheet. Reading assignments are due on the first day of
the unit — with the exception of the first unit, “Beginning Concepts”.)

Objectives: This course will introduce you to the complexity and creativity of the human use of
language. Like breathing, walking, and sleeping, producing and understanding speech is a natural
activity that we engage in, daily, with little or no conscious awareness. Psycholinguistics is a field that
studies the unconscious processes that underlie these abilities. The more you understand about
language, the more you understand about yourself and the people around you. LCD 105 is a course that
all students should enjoy and find valuable, regardless of their major. For Linguistics majors, this course
will complement the courses you take that deal with the formal and social aspects of language. For
Communication Sciences and Disorders majors, this course provides useful introductory material that will
prepare you for other courses in the major.

Grading Policy: There will be three exams, each consisting of objective questions (multiple choice,
matching, and so on). Your final grade will be based on your scores for these three exams. Please do
not ask for extra work to improve a poor grade: the answer will be “no”. The schedule for the
exams is listed on the back of this page. If you must miss an exam because of extraordinary
circumstances, you must notify me in advance, and you must schedule a make-up exam with the
departmental office (718-997-2870). A word of caution: make-up exams are always essay exams, and
people tend not to do as well on them as on the multiple-choice exams.

A Recipe for Successful Performance in This Class: Attend class regularly. Read each assignment
twice: the first time to prepare you for the lectures, the second to reinforce what you learned in class.
Before we begin a unit, go over the study questions at the end of the assigned chapter so you will know
what to focus on. At the end of the unit, make sure you can answer all the study questions. There will
be overlap between the readings and the lectures; however, you will be responsible for everything in
each — so, again, attend class regularly, and read all assignments. The schedule for this “semester” is
printed on the back of this sheet. To avoid falling behind, pace yourself with the readings and plan
ahead. The workload for this course is not tremendous, but you may find some of the material difficult
because it’s new. Your goal should be to understand the concepts presented, rather than to simply
memorize the facts.

Classroom Behavior: This is a large class. It’s everyone’s responsibility to be respectful of others in
the class: no talking, no note passing, no loud gum chewing, no paper rattling, no snoring… While you
should refrain from talking to your peers during class, you’re encouraged to ask questions and to
contribute to class discussions. Try to be on time for class, and don’t leave before it’s over. If you have
to leave early, let me know in advance. If you must come in late, simply enter quietly and find a seat.
## CLASS SCHEDULE AND ASSIGNMENTS

</table>

There will be some recommended assignments posted online, as well as practice quizzes for each of the chapters. Check the course web for more information.

Remember to use the study questions at the end of each chapter: reading them before you read the chapter will help you look for important information in the text.

This class has online support, on CUNY’s BlackBoard server. The BlackBoard site for this class will give you access to supplementary materials, answer keys for exams, and student grades, and will keep you informed with important announcements.

To access the BlackBoard server:
- If you already have a CUNY Portal ID, login at [https://blackboard-doorway.cuny.edu](https://blackboard-doorway.cuny.edu).
- If you don’t have a CUNY Portal ID, go to the CUNY Portal, [http://www.cuny.edu](http://www.cuny.edu), and get yourself registered.
- If you have questions, you’ll probably find answers at [http://qcpages.gc.cuny.edu/edtech/BlackBoard/](http://qcpages.gc.cuny.edu/edtech/BlackBoard/).

A copy of this syllabus is available both on the course web and on my website ([http://qcpages.gc.cuny.edu/~efernand/](http://qcpages.gc.cuny.edu/~efernand/), “Teaching”).

Any scheduling changes will be announced on the course web.
