### **EDUCATION**

Princeton University, BA (cum laude), Public and International Affairs, 1996  
University of California, Berkeley, Ph.D, Economics, 2002  
Dissertation Title: "Three Essays on Heterogeneity in Macroeconomics"

### **PROFESSIONAL EXPERIENCE**

2014–present: Visiting Professor, Department of Demography, University of California, Berkeley  
2011–present: Associate Professor of Economics with tenure, Queens College, City University of New York, effective date: September 1, 2011. *On leave, Fall 2014–present.*  
2006–2011: Assistant Professor of Economics, Queens College, City University of New York  
2011–present: Research Associate in Health Economics, National Bureau of Economic Research, effective date: October 1, 2011.  
2008–2011: Faculty Research Fellow in Health Economics, National Bureau of Economic Research  
2007–present: Doctoral Faculty Member, the Graduate Center of the City University of New York  
2009–present: Faculty Associate, CUNY Institute for Demographic Research  
2014–2016: Consultant, National Research Council (NRC) Panel on Economic and Fiscal Consequences of Immigration  
2012–2013: Visiting Scholar, Department of Demography, University of California, Berkeley while on sabbatical leave from CUNY  
2009–2013: Member, Institute of Medicine (IOM) Committee on the Readjustment Needs of Military Personnel, Veterans, and their Families  
Spring 2009: Visiting Professor, Department of Biological Sciences, Stanford University  
2007–2009: Faculty Affiliate, CUNY Institute for Demographic Research  
2004–2006: Visiting Scientist, Department of Population and International Health, Harvard School of Public Health  
2004–2006: Postdoctoral Fellow in the Study of Aging, RAND Corporation, Santa Monica, CA  
2002–2004: Postdoctoral Scholar, Biological Sciences, Morrison Institute, Stanford University  
1998–1999: Staff Economist in Macroeconomics, Council of Economic Advisers, Washington

Edwards, Ryan D. (2008) "Measuring Socioeconomic Differentials in Mortality," working paper, June.

Edwards, Ryan D. (2006) "Individual Perceptions of Mortality Decline," working paper presented at the 2006 Annual Meeting of the Population Association of America, March.

## FELLOWSHIPS AND AWARDS

1999–2001: National Institute on Aging predoctoral training grants T32 AG00246-99, -00, -01

## GRANT ACTIVITY

### FUNDED

5 R01 DA036514 (PI: El-Bassel) 7/1/2014 – 5/31/2019

NIH/NIDA

"Evaluating a Microfinance Intervention for High-Risk Women in Kazakhstan"

The proposed study will examine the efficacy of a combined HIV and microfinance intervention to reduce biologically confirmed sexually transmitted infections (STIs), and new incidence of HIV and HCV, as well as reported sexual and drug risk behaviors among 520 women who have injected drugs in the past year and who engage in sex trading in Temirtau and Pavlodar, Kazakhstan.

Role: Subcontract

### FUNDED

5 R01 DA033168 (PI: El-Bassel) 12/1/2012 – 11/30/2016

NIH/NIDA

"Couple HIV Prevention for Drug-Involved Male Offenders: An Effectiveness Trial"

This proposal aims to evaluate the effectiveness and cost-effectiveness of a couple-base HIV/STI and drug abuse brief prevention intervention with drug-involved male offenders on probation and their primary female partners in the South Bronx and Brooklyn, NY.

Role: Subcontract

### PAST

1 R03 AG028277 (PI: Edwards) 9/1/2007 – 8/31/2010

NIH/NIA

"Investigating the Health and Mortality of Veterans"

This project focuses on health disparities in veterans according to rank. It will examine existing microdata on veterans populations and assess whether differences in health through rank are accounted for by differential stress, smoking, or access to care.

Role: PI

PAST

PSCOOC-38-161 (PI: Edwards)

7/1/2007 – 6/30/2008

PSC-CUNY

“Measuring and Valuing Life-Span Variance in Developing Countries”

This project focuses on gathering existing historical and current life tables for developing countries, inferring historical mortality patterns in underrepresented regions using the best available methods, and gauging and valuing trends in the variance around the average length of life.

Role: PI

SUBMITTED BUT NOT FUNDED

1 R03 AG043779-01 (Edwards)

NIH/NIA

“Behavioral Consequences of Uncertain Life Span”

Individuals with more education, income, or wealth tend to live longer than those with less, which is a well-known disparity in health. Recent research also suggests that length of life is also more uncertain for the poor or less educated. The goals of this project are to study how individuals perceive these differences in length of life and how those perceptions influence behavior over the life cycle like saving and retirement.

Role: PI

SUBMITTED BUT NOT FUNDED

1 R01 AG034490-01 (PI: Deb)

10/1/2009 – 9/30/2011

NIH/NIA

“Forecasting Medicare Expenditures using Multivariate Time Series Models”

Per NIA’s request for proposals, we forecast Medicare spending using a array of macroeconomic and some microeconomic approaches. Key elements are demographic forecasts and vector autoregression time series models.

Role: Subcontract

SUBMITTED BUT NOT FUNDED

R01 AG029610-01A1 (PI: Kotlikoff)

12/1/2008 – 11/30/2010

NIH/NIA

“Can Retirees Sustain Their Living Standards in Retirement?”

This project aims to understand whether today’s retirees can sustain their living standards through retirement, through widowhood, and through downturns in financial markets. It will examine nationally representative spending data and apply financial planning software to assess sustainability.

Role: Subcontract

SUBMITTED BUT NOT FUNDED

CUNY Collaborative Incentive Research Grant 1521

7/1/2008 – 7/1/2009

“Can’t Buy Me Life! Racial Inequalities in Mortality in Queens County and New York City”

In this project, we will first document racial inequalities in mortality in Queens County and compare our results to what we find in national and other local data, and we will also descend to the Census tract level and decompose contributions to county-wide inequality. We will assess the role that external-cause mortality may play by decomposing causes of death.

Finally, we will examine trends over time in mortality. We will then explore the explanatory roles played by covariates of mortality by linking mortality statistics to income and education at the level of Census tract. We will also examine data on hospital discharges for evidence of differential quality of care.

Role: co-PI
