PROJECT MANAGEMENT PROFESSIONAL CERTIFICATE PROGRAM

Everybody is talking about projects. More companies are requiring certification and looking for skilled individuals to get projects started and successfully completed. But why do most projects fail to meet requirements? What does it take to be a successful project manager? Here is an opportunity to learn about project management via a hands-on approach. Familiarize yourself with the major areas of competency required to succeed in the field.

PROGRAM DESCRIPTION

Project Management Professional (PMP) Certificate Program focuses on developing and improving the performance of projects and programs, either in the field of technology, finance/accounting, building construction and industrial expansion, or any other field which require project managers to initiate the projects. Individuals with their current fields of expertise will be able to deploy the projects with competency after completion of this training program. This program is developed in alignment to PMI/CompTia standards. Completion of two modules, Introduction to Project Management and Advanced Project Management prepares students for the Project Management Institute (PMI) certification exam.

Textbooks required; must be purchased before first session.
